

Pass-Through Window

Description:

Transforma Healthcare offers the solution of a Pass-through window used and located in hospitals, more specifically to serve in Operation Rooms that have access to sterile stores/locations; where it will allow items and equipment to be -rapidly- delivered into the operation theater while maintaining the sterile environment.

Transforma has selected to realize the Pass-through window using Stainless Steel AISI 304 a material that is anti-corrosive and capable of handling the rigorous hygiene detergents.
